Product Brief

The Reflex Photonics 120Gbps LightABLE™ SR12 LH series Optical Transceiver Industrial and Commercial Temperature Range*

THE Light on Board® family of optical engine technology in its smallest form-factor.

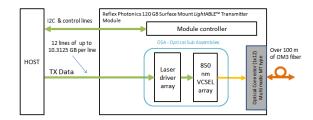

The Reflex Photonics *Light*ABLE™ LH SR12 Optical Engines delivers 120Gbps over 12 fiber optic channels. The Reflex Photonics *Light*ABLE™ Optical Engine is an integrated solution for converting between high-speed electrical and optical I/O.

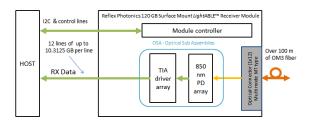

The LightABLE™ Optical Engine is a low-profile pre-aligned parallel electrical - to - optical (or optical - to - electrical) transmitter (or receiver). The optical engines can be mounted directly upon a high-speed printed circuit board via surface mountable 1.27 mm pitch BGA or via a MEG-array® connector.

The LightABLE™ LH optical engine's small form factor and low power consumption make it ideal for space-constrained applications.

Summary Specifications:

- Commercial Temp. range 0 °C to 70 °C
- Industrial Temp. range -40 °C to 100 °C**
- Bit Error Rate of 1E-12
- Sensitivity of -12 dBm
- Up to 10.3125-Gbps per channel
- Short-Reach 850-nm VCSELs
- Standard 1x12 MT optical interface
- 12 Differential CML Inputs/Outputs
- Amphenol/FCI MegArray™ Connector
- Footprints of 17-mm x 17-mm
- Link Distance up to 100-m (OM3 fiber)
- I2C communication interface
- Asynchronous channel operation
- Data protocol agnostic with balancedcode
- Tin-Lead or RoHS options

Reflex 12 x 10G LightABLE™ LH Transmitter & Receiver

contact: sales@reflexphotonics.com

^{*}The Light ABLE $^{\mathsf{TM}}$ LM version is recommended for new design.

^{**} Industrial part qualified between -40 °C to 85 °C. Please communicate with Reflex for detailed information on operation over 85 °C

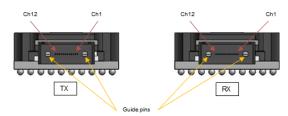

Applications:

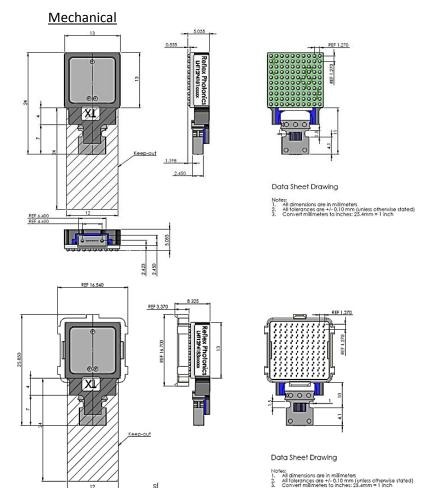

The LH SR12 module targets applications that require very large bandwidths in confined areas and are typically co-located with high-speed, high port count FPGAs or ASICs. The modules provide robust operation and high operating temperature ranges. Typically the modules are used in:

- Phased array radars
- FPGA Serdes Interfaces
- Multi-processor interconnects
- CCD/CMOS Imaging sensor arrays
- High fidelity radar imagery

Optical Interface Lanes:

Outside view of the LightABLE™ LH module MT receptacles

Transmitter and Receiver engines mechanical outline are the same.

PRODUCT VARIANTS

*Light*ABLE™ LH SR12 transmitters and receivers are available in several <u>operating temperature variants</u>

- Industrial Operating Temperature Range (-40 to +85°C) (Tcase)
- Commercial Operating Temperature Range (0 to +70°C) (Tcase)

Each temperature variant is available in mounting options of

- Surface mount: Pb / Leaded solder balls
- Pluggable: RoHS / Lead-Free MegArray® connector
